

Price quality and participant cost are independent

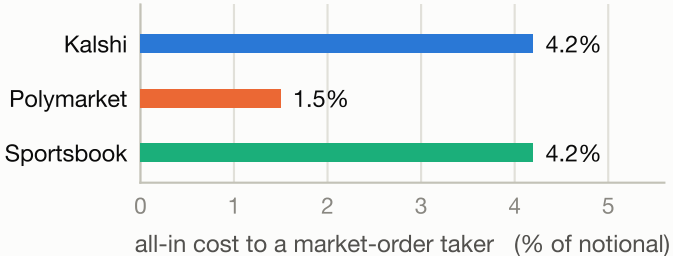

Same 5,327 games. Left is the forecasting question; right is the gambling question. Neither answers the other.

How good is the price?

shaded: the band inside which a difference cannot be monetised

What does the customer pay?

the venue defended as a forecasting instrument and the venue everyone calls gambling charge the same 4.2%

three_way.log / immediacy.log · Polymarket all-in runs 1.25-1.75%; makers trade near-free on both exchanges, and the fill tape says the customer is a taker.
