

Same games, three institutions, two questions

5,333 games priced by a CFTC-regulated exchange, an offshore crypto exchange, and the professional sportsbook complex.

0.2196

Brier score, all three venues

within 0.0002 of each other

4.2%

all-in cost to a taker

Kalshi and the sportsbooks alike

13e-3

how far all three beat

a public-statistics floor ($z \sim 7.3$)

three_way.log, immediacy.log, model_benchmark.log · the first two numbers are the report's whole argument: the forecast is excellent and the customer's cost is a sportsbook's.
